

Education

The University of Texas Rio Grande Valley	Brownsville, TX
Bachelor of Science in Computer Science	Jan. 2025 – Dec. 2027
<i>Relevant Coursework:</i> Data Structures, Algorithms, Software Engineering, Database Systems, Computer Networks, AI, Web Development, Mobile App Development	
Texas Southmost College	Brownsville, TX
Associate of Science in Computer Science	Aug. 2023 – Jun. 2025
<i>Relevant Coursework:</i> Data Structures, Algorithms, Operating Systems, Database Management, Object-Oriented Programming	

Technical Skills

Languages: Python, JavaScript, HTML/CSS, Java, C#, C++, SQL
Technologies: Flask, Git, REST APIs, Linux, Cloud Technologies (AWS basics), Microsoft Office Suite
Concepts: Object-Oriented Programming, Data Structures & Algorithms, Database Management, Operating Systems
Languages (Human): English (Fluent), Spanish (Fluent)

Experience

Patient Access Representative	May 2024 – Present
<i>Conifer Health Solutions</i>	<i>Brownsville, TX</i>
- Processed and managed data for 50+ emergency room patients daily, maintaining 99% accuracy across demographic, insurance, and billing records in a compliance-critical environment. - Streamlined revenue-cycle workflows by accurately capturing insurance authorizations and copay data, reducing downstream billing errors and improving operational throughput. - Maintained strict HIPAA compliance while collaborating cross-functionally with medical staff to ensure timely, accurate recording of patient information.	
Animal Care Specialist & Guest Services	Jun. 2023 – May 2024
<i>Gladys Porter Zoo</i>	<i>Brownsville, TX</i>
- Maintained detailed digital records of feeding schedules, dietary requirements, and behavioral observations for 15+ species, supplying accurate data to veterinary staff. - Operated point-of-sale systems processing 100+ daily transactions with accurate cash handling, balancing, and end-of-day reporting.	

Projects

Class Schedule Organizer Python, Flask, SQL, HTML/CSS, JavaScript	2025
- Built a full-stack web app that lets students input course options and automatically suggests conflict-free schedules optimized around their availability and preferences. - Designed a relational database schema to store course sections and time slots; implemented RESTful Flask routes and a dynamic front-end for real-time schedule rendering.	
Inventory Management System C++	2024
- Built a console-based inventory tracking system using OOP principles, supporting CRUD operations, low-stock alerts, and formatted sales reporting. - Applied data structures concepts including linked lists and sorting algorithms to efficiently manage and query inventory records.	
Small Business Landing Pages HTML, CSS, JavaScript	2023 – Present
- Designed and built responsive landing pages for local small businesses, implementing interactive JS elements to improve user engagement and mobile usability. - Collaborated directly with clients to translate business needs into clean, functional web layouts delivered on tight timelines.
